SUBJECT INDEX

Administration conditions
  directions for formula scores: 1
  directions for number correct scores: 1
  guessing and weighting directions: 1

Bias in measurement
  definitions of: 33

Certification: 113

Change
  in intelligence test scores: 283
  measurement and prediction of: 191

Classroom testing
  computer assisted: 377

Computerized adaptive testing
  applications of: 361
  evaluation of: 347

Covariance structure analysis
  application of: 191

Criterion-referenced testing: 59

Diagnostic testing: 175, 391

Educational achievement
  measurement of: 215

Educational measurement
  psychology of: 215

Equivalence of test scores: 19

Essay tests: 277

Exploratory data analysis
  applications of: 81

Factor analysis
  confirmatory: 153

Intelligence tests: 283

Interests
  measurement of: 261

Item analysis
  use of item response models: 331

Item banking: 19, 315, 331

Item banks
  design of: 315

Item bias
  detection of: 49, 131
  manipulation of: 49

Language testing
  measurement of: 191

Latent class models
  applications of: 59

Latent trait models
  applications of: 49, 347, 361
  obtaining trait estimates: 93
  use in education: 361

Logit model: 131

Minimum competency testing: 113

Prediction studies
  of achievement: 245
  meta-analysis of: 245

Race differences: 81

Rasch model
  applications of: 19, 331

Reliability
  and standard errors: 239

Scoring of tests
  and reliability: 1
  effects of sequence on: 277
  using latent trait models: 93

Selection bias: 33

Self-concept
  measurement of: 153

Standard error of measurement
  at different ability levels: 239

Standard setting: 113, 147

Teacher-made tests: 377

Technology
  and testing: 399

Validity
  construct: 153

Vocational interests
  taxonomy of: 261
